1. At a meeting of the plant SED organization held on 2 October 1956, it was resolved that the "Geraetewerk" (Apparatus Plan) be fully incorporated into the "Werk fuer Fernmeldewesen" (telecommunication engineering plant) (WF). The Geraetewerk would thus be given the status of a "Bereichsproduktion". The meeting on 2 October was attended by all party functionaries of the Geraetewerk, its manager Waskow, Dr. Schiller and staff members of the plant administration. On 1 October 1956, Diesing was transferred to the Main Plant and was given the assignment to supervise the construction of the Image Tube Plant. Von Koever went on leave on 7 October. He will probably leave the installation and will take a job in the field of commercial television at Karlshorst. Metz became the ranking local representative within the "Produktionsbereich" for Apparatus and simultaneously deputy to Netzel. As he is also chief of the test field, he holds a key position in the plant. He is a member of the SED.

2. In order to conceal the non-fulfilment of production targets by the Geraetewerk, production figures have since recently only been given for the entire Werk fuer Fernmeldewesen. The fulfilment of production plans by WF was as follows:

September 1956: 151.1 %

third quarter of 1956 : 133 %

period January to September 107.9 %

over-all fulfilment related to the annual production targets : 76.6 %

3. Wage earners, foremen and engineers were scheduled to be paid after 1 October 1956, according to the wage schedules in force for plants controlled by the Ministry of Heavy Machine Construction.

4. In September 1956, no table of organization was in force for the Geraetewerk. New plans for the personnel required will be worked out by Watzel, Gawronski and Grasse. The blanks left in the attached organizational schedule represent vacancies.

5. On 3 October, Netzel requested to be admitted into the SED.
